Total CO2e

12.07kg

Total Energy

22.61 kWh

Breakdown Analysis

End User Device Emissions

CO2e

7.84 kg

Operational

3.84 kg

Embodied

3.99 kg

The lifecycle breakdown of the emissions of the end user devices for this site/app across manufacturing and end of life (embodied) and use-phase (operational).

End User Device Energy

Energy

14.05 kWh

CPU

6.56 kWh

Screen

6.25 kWh

Data

35.98 Wh

Idle

1.20 kWh

The component level breakdown of the use-phase (operational) energy consumed on the end user devices for this site/app
